

# Waxiang Chinese

**Waxiang** (simplified Chinese: 瓦乡话; traditional Chinese: 瓦鄉話; pinyin: wǎxiānghuà; *ɛiɔŋ ɿtsa i*) is a divergent variety of Chinese,<sup>[2][3]</sup> spoken by the Waxiang people, an unrecognized ethnic minority group in the northwestern part of Hunan province, China. Waxiang is a distinct language, very different from its surrounding Southwestern Mandarin, Xiang and Qo Xiong languages.

## Classification

As noted by Laurent Sagart (2011)<sup>[4]</sup> and others,<sup>[5][6][7]</sup> Waxiang appears to share some words with the Caijia language of western Guizhou. Sagart (2011) considers Caijia to be a sister of Waxiang. Currently, Waxiang is classified as a divergent Chinese variety rather than a non-Sinitic language.<sup>[2][3]</sup> Similarities among Old Chinese, Waxiang, Caijia, and Bai have also been pointed out by Wu & Shen (2010).<sup>[8]</sup>

Qu & Tang (2017) show that Waxiang and Miao (Qo Xiong) have had little mutual influence on each other.<sup>[9]</sup>

## Distribution

Waxianghua is found in Luxi, Guzhang and Yongshun counties in Xiangxi Tujia and Miao Autonomous Prefecture, Zhangjiajie prefecture-level city (in Dayong 大庸), and Chenxi, Xupu and Yuanling counties in Huaihua prefecture-level city. Neighboring languages include Southwestern Mandarin, Xiang Chinese, Tujia, Qo Xiong, and Hm Nai.

## Conservative features

---

Waxiang preserves a number of features of Old Chinese not found in most modern varieties of Chinese, such as the initial \*l- (which became a voiced dental stop in Middle Chinese):<sup>[11]</sup>

- Guzhang li<sup>6</sup>, 地 OC (Baxter–Sagart) \*l̥ ejs > MC *dijH* > Mandarin *dì* 'earth, ground'
- Guzhang lu<sup>6</sup>, 大 OC \*l̥ ats > MC *dajH* > Mandarin *dà* 'big'
- Guzhang li<sup>2</sup>, 遅 OC \*l̥rəj > MC *drij* > Mandarin *chí* 'slow'
- Guzhang lu<sup>7,8</sup>, 讀 OC \*C.l̥ ok > MC *duwk* > Mandarin *dú* 'read'

Waxiang also has some cases of /z/ for Old Chinese \*r- (which became *l-* in Middle Chinese):<sup>[12]</sup>

- Guzhang za<sup>2</sup>, 梨 OC \*C.rəj > MC *lij* > Mandarin *lí* 'pear tree, pear'
- Guzhang zε<sup>2</sup>, 來 OC \*mə.r̥ək > \*r̥ək > MC *loj* > Mandarin *lái* 'come'

In a number of words, Waxiang and Proto-Min have affricate initials where Middle Chinese has sy-:<sup>[13]</sup>

- Guzhang tsu<sup>3</sup>, pMin \*tšyi<sup>B</sup>, 水 OC \*s.tur? > MC sywījX > Mandarin *shuǐ* 'water'
- Guzhang tɕiəu<sup>1</sup>, pMin \*tšy<sup>A</sup>, 書 OC \*s-ta > MC *syo* > Mandarin *shū* 'writing'

In some words, Waxiang and Proto-Min have voiced affricates where Middle Chinese has y-:<sup>[14]</sup>

- Guzhang dzonj<sup>3</sup>, pMin \*-džionj<sup>B</sup>, 瘡 OC \*Cə.ganj? > MC *yang*X > Mandarin *yǎng* 'itch'

## **Waxiang and Caijia**

---

Sagart argues that Waxiang and Caijia together constitute the earliest branching of Chinese. Like Waxiang, Caijia preserves Old Chinese \*l-, has a voiced fricative reflex of \*r-, and retains the Old Chinese word 字 'love', which has been replaced by 爱 in all other Chinese varieties. Waxiang and Caijia also share two words not found in other Chinese varieties:<sup>[4]</sup>

- 'two': Caijia ta˥, Waxiang tso˥, from Old Chinese 再 \*ts<sup>r</sup>əs 'twice'
- 'milk': Caijia mi˥, Waxiang mi˥, which Sagart suggests is a non-Sinitic word
